PROFILE

An intellectual individual looking to build a new career as a Junior Developer having recently undertaken the Full-Stack Web Development bootcamp at Le Wagon, London where, in collaboration with 4 team members, I developed and deployed the 'Chromatic' music events app.

A confident, committed character striving for perfection in all aspects of life, looking to lead by example and considered loyal and trustworthy by family and peers. An optimistic personality shows the need to reach for the positives in everything that I participate in.

EDUCATION

Jan – Mar 2023

Le Wagon, London
Full-Stack Web Development

Languages/Frameworks:

- HTML, CSS & JavaScript
- Ruby on Rails
- PostgreSQL
- Bootstrap
- AJAX/Stimulus
- Git/GitHub
- Figma

PROJECTS

Personal Portfolio

My responsive personal portfolio uses HTML, CSS, and JavaScript for both front and back-end and has been deployed using Heroku. The page includes a contact form which sends messages directly to my email inbox using FormSubmit. Each of my projects listed in my CV can be viewed by visiting my portfolio webpage.

Chromatic

Developed and deployed to production. 'Chromatic' is a mobile social platform dedicated to allowing lovers of live music events to connect and interact through their common interest in specific music genres and artists. The platform was designed on Figma and built using Ruby on Rails for the back-end, PostgreSQL for the database and HTML, CSS and Stimulus JS for the front-end. Features include the ability to filter through event genres and video-messaging event attendees using Agora and Rest API.

TRANSFERABLE EXPERIENCE

Jun – Dec 2022

Broadcast Production Assistant
Captured World

Played a critical role in ensuring that the technical and logistical aspects of podcast production ran smoothly. During my time I learned the value of effective communication when explaining technical issues to a non-technical clientele. I was part of a small team that produced a podcast called "Life After Prison" which fueled

my desire to solve problems with a logical approach. The post-production editorial process developed my ability to focus on detail to ensure a high-quality final piece of content that engages its audience and listeners.

Skills: Adaptability · Communication · Time Management · Attention to Detail · Problem Solving

Oct 17 – Apr 18

Physiotherapy Assistant

Heatherwood Hospital

Worked as part of a team to provide high-quality care to patients. Playing a vital role in helping patients achieve their rehabilitation goals and improving their quality of life having undergone Hip/Knee replacements or Arthroscopies.

Skills: Analytical Skills · Collaboration · Leadership · Emotional Intelligence
